

RTN4IP1 Human

Description: RTN4IP1 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 379 amino acids (41-396 a.a.) and having a molecular mass of 41.4kDa. RTN4IP1 is fused to a 24 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques.

Catalog #: PRPS-1021

For research use only.

Synonyms: Reticulon-4-interacting protein 1 mitochondrial, NOGO-interacting mitochondrial protein, RTN4IP1, NIMP.

Source: E.coli.

Physical Appearance: Sterile Filtered colorless solution.

Amino Acid Sequence: MGSSHHHHHH SSGLVPRGSH MGSTVMPAWV IDKYGKNEVL
RFTQNMMPPI IHYPNEVIVK VHAASVNPID VNMRSGYGAT ALNMKRDPLH VKIKGEEFPL
TLGRDVSQV MECGLDVKYF KPGDEVAAV PPWKQGTLS FVVSGNEVS HKPKSLTHTQ
AASLPYVALT AWSAINKVG LNDKNCTGKR VLILGASGGV GTFQVQVMA WDAHVTAVCS
QDASELVRKL GA

Purity: Greater than 95% as determined by SDS-PAGE.

Formulation:

RTN4IP1 protein solution (1mg/ml) containing 20mM Tris-HCl buffer (pH8.0), 20% glycerol and 1mM DTT.

Stability:

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.

Usage:

NeoBiolab's products are furnished for LABORATORY RESEARCH USE ONLY. The product may not be used as drugs, agricultural or pesticidal products, food additives or household chemicals.

Introduction:

RTN4IP1 is a unique mitochondrial protein that interacts with reticulon 4, which is an effective inhibitor of regeneration ensuing spinal cord injury. The reticulon 4 interaction with mitochondrial proteins may offer insight into the mechanisms for reticulon-induced inhibition of neurite growth.
